DELOS Project Family Tree

Project Interactions

DL = Search Engine?

DL = Digitization + Search Engine?

The screenshot shows a Microsoft Internet Explorer browser window displaying search results on the ACM Digital Library portal. The address bar shows the URL: <http://portal.acm.org/results.cfm?coll=ACM&dl=ACM&CFID=43337872&CFTOKEN=75220149>. The search results are for the query "fractals everywhere", showing 9,227 results out of 153,034 total. The first result is "Design and analysis of fractals in an individual computing environment" by Ka-Wing Wong and Jimmy Pack, published in February 1995 in the Proceedings of the 1995 ACM symposium on Applied computing. The second result is "Ray tracing deterministic 3-D fractals" by J. C. Hart, D. J. Sandin, and L. H. Kauffman, published in July 1989 in ACM SIGGRAPH Computer Graphics, Proceedings of the 16th annual conference.

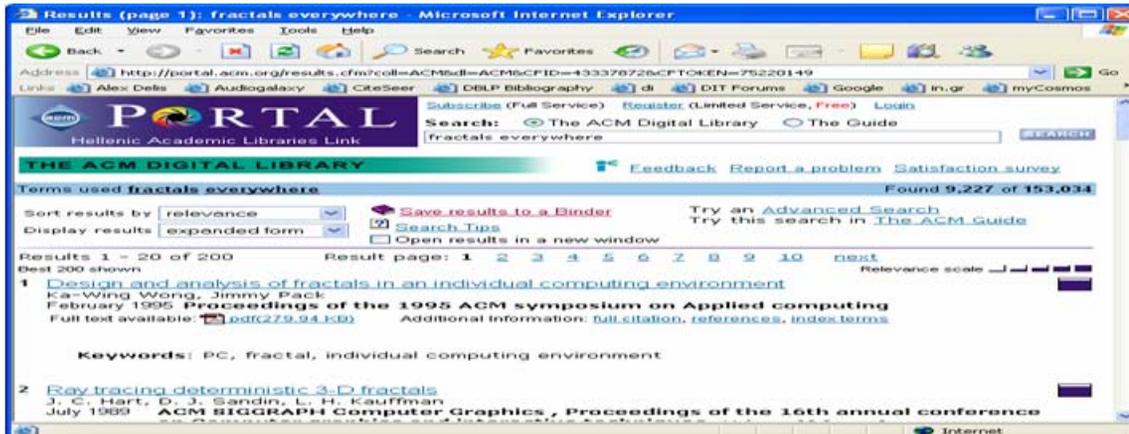

DL Definition

- **What:** specialized content and services
 - comprehensive
 - rich forms and kinds
 - read-and-expand-mostly
- **Why:** learning and research
- **When:** value at depth of time
- **How:** measurable quality

Classification

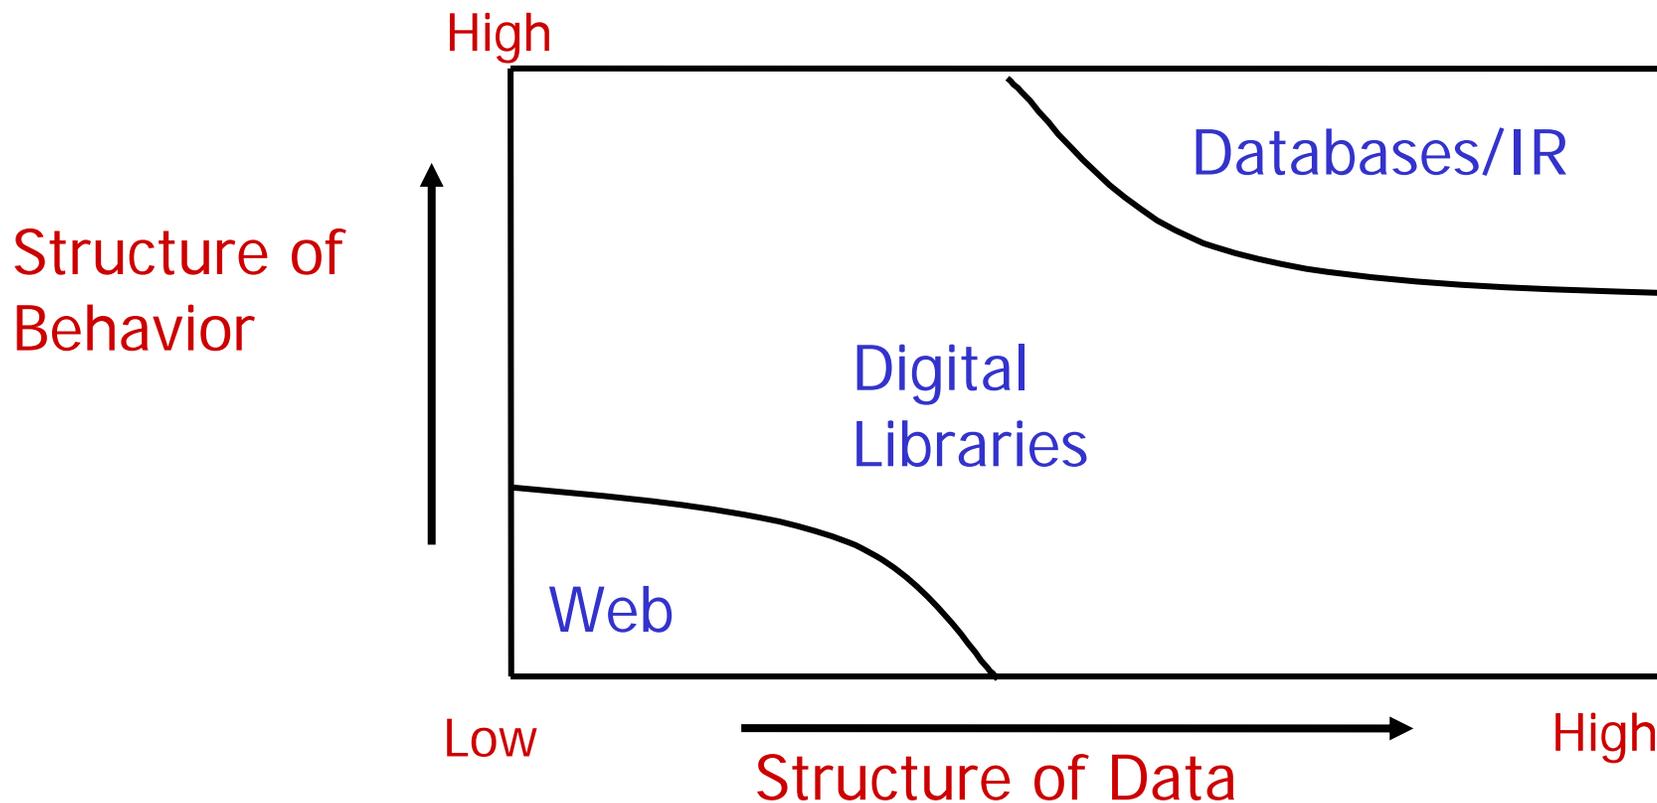

NO

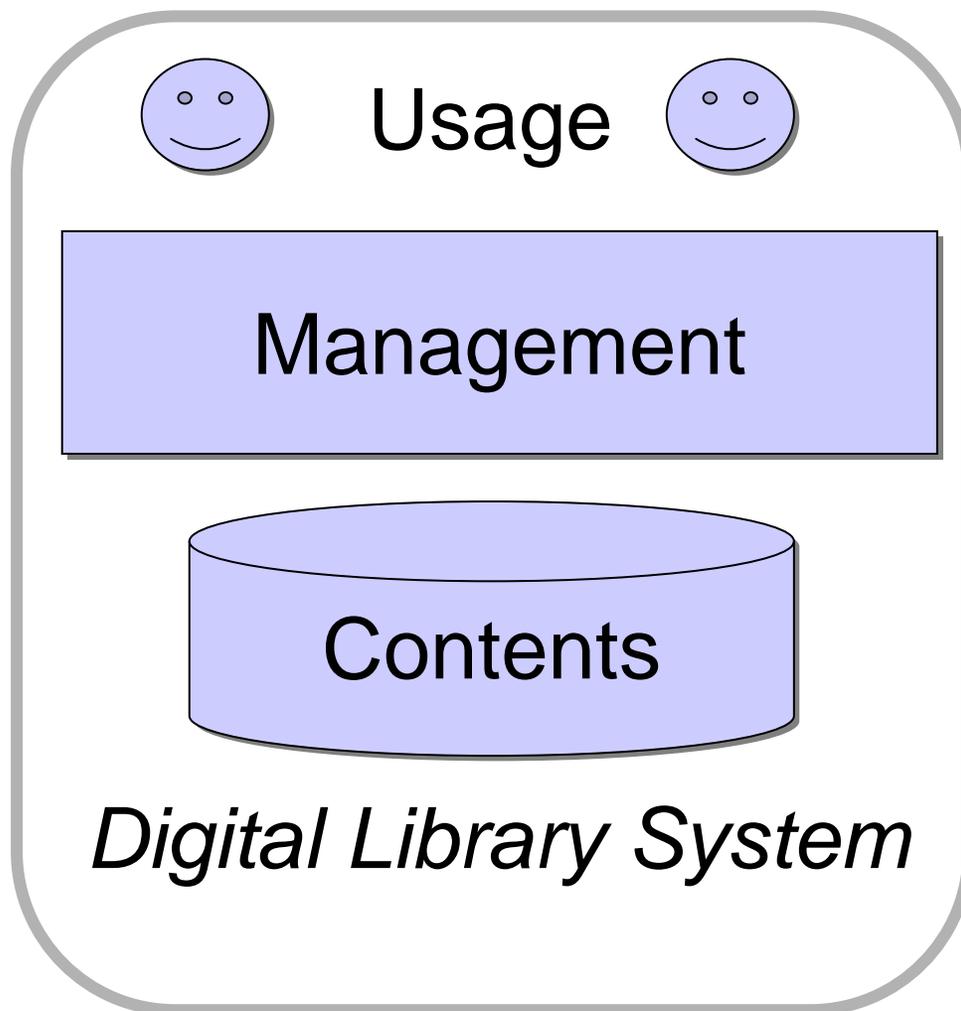

yes

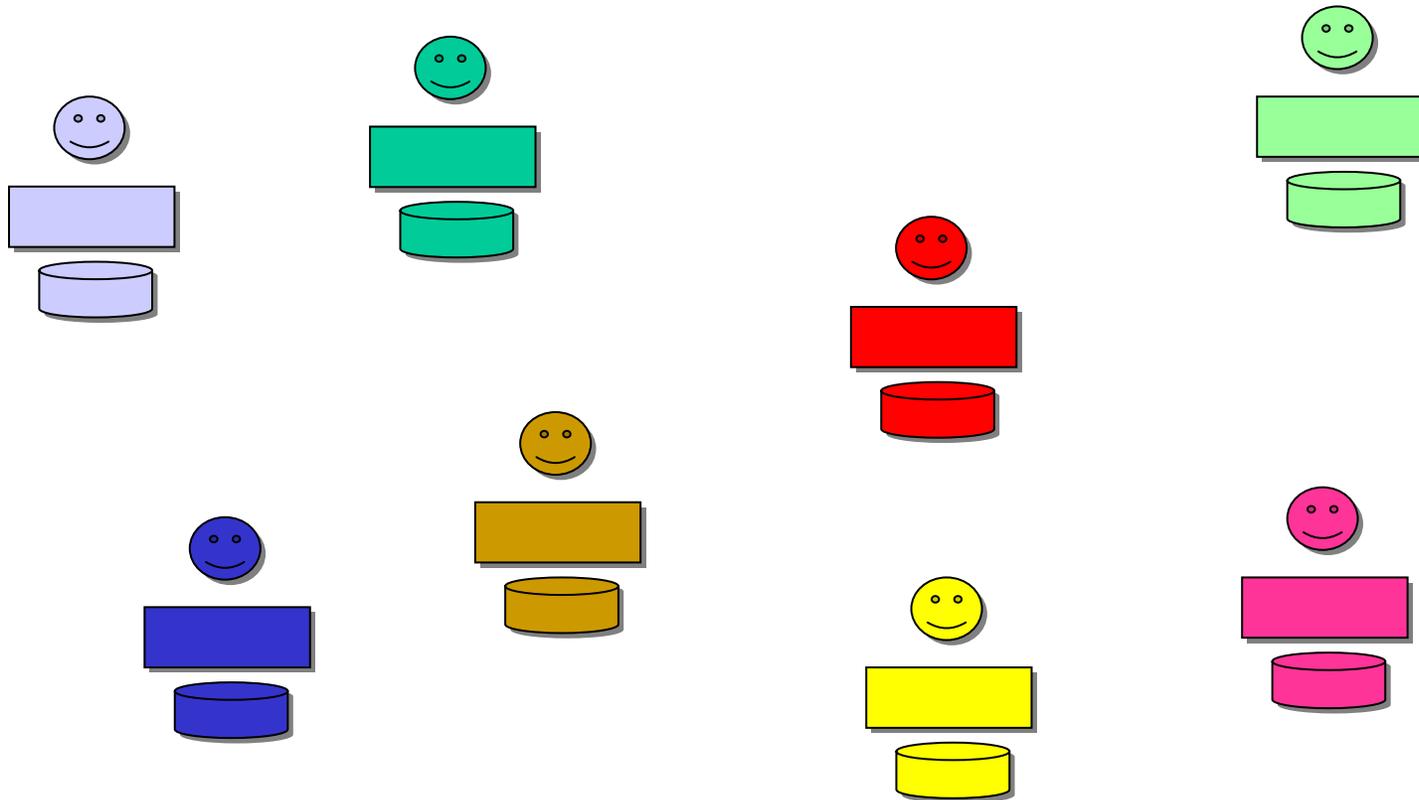

Information Space for DLs

Conceptual Framework

Current Methodology

Current Methodology

Content-centric

Targeted for static storage

Isolated systems

Environment-specific

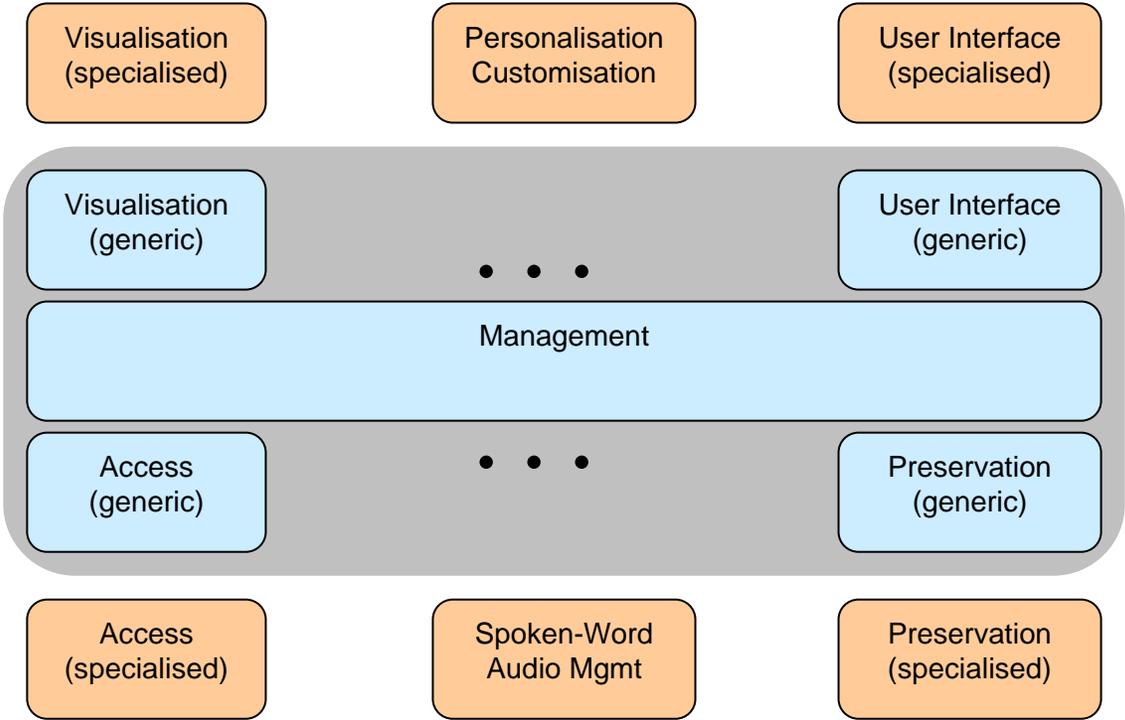

Isolated and repeated efforts

Current Myths

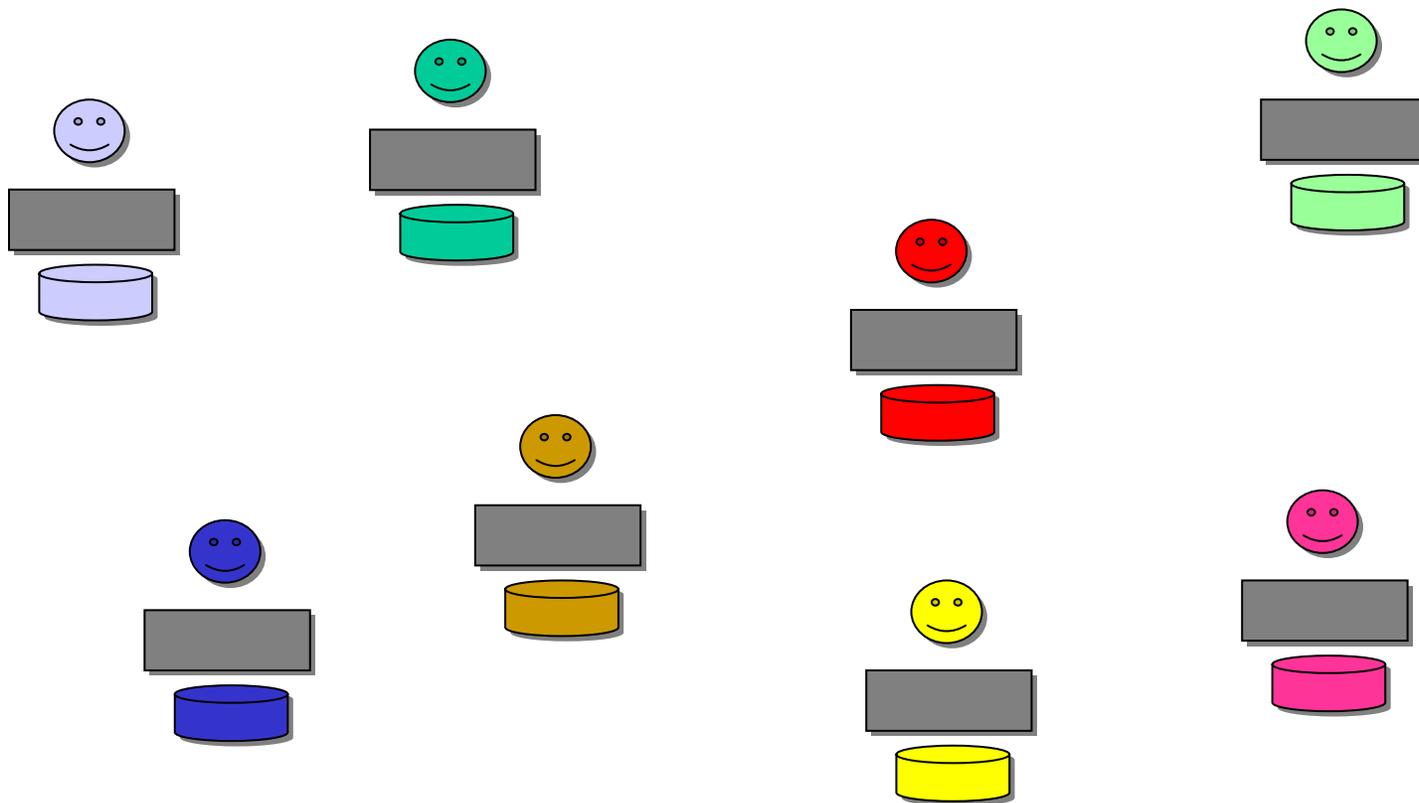

Digital Libraries are for things in Libraries only

Digital Libraries are for Cultural Heritage only

Digital Library Management Systems

Future Development Methodology

Future Development Methodology

Content-centric

Targeted for static storage

Isolated systems

Environment specific/Repeated efforts

Generic DLMS technology to build on

Grand 10-Year Vision #1

Digital libraries should enable **any citizen** to access **all** human knowledge **anytime** and **anywhere**, in a **friendly, multi-modal, efficient,** and **effective** way, by overcoming barriers of **distance, language, and culture** and by using multiple **Internet-connected** devices

Grand 10-Year Vision #2

The potential exists for digital libraries to become the **universal** knowledge repositories and **communication conduits** for the future, a common vehicle by which **everyone** will access, **discuss, evaluate, and enhance** information of **all** forms

Future Digital Libraries

Content-centric

Person-centric

Targeted for static storage

Targeted for active communication/collaboration

Isolated systems

Global distributed interacting systems

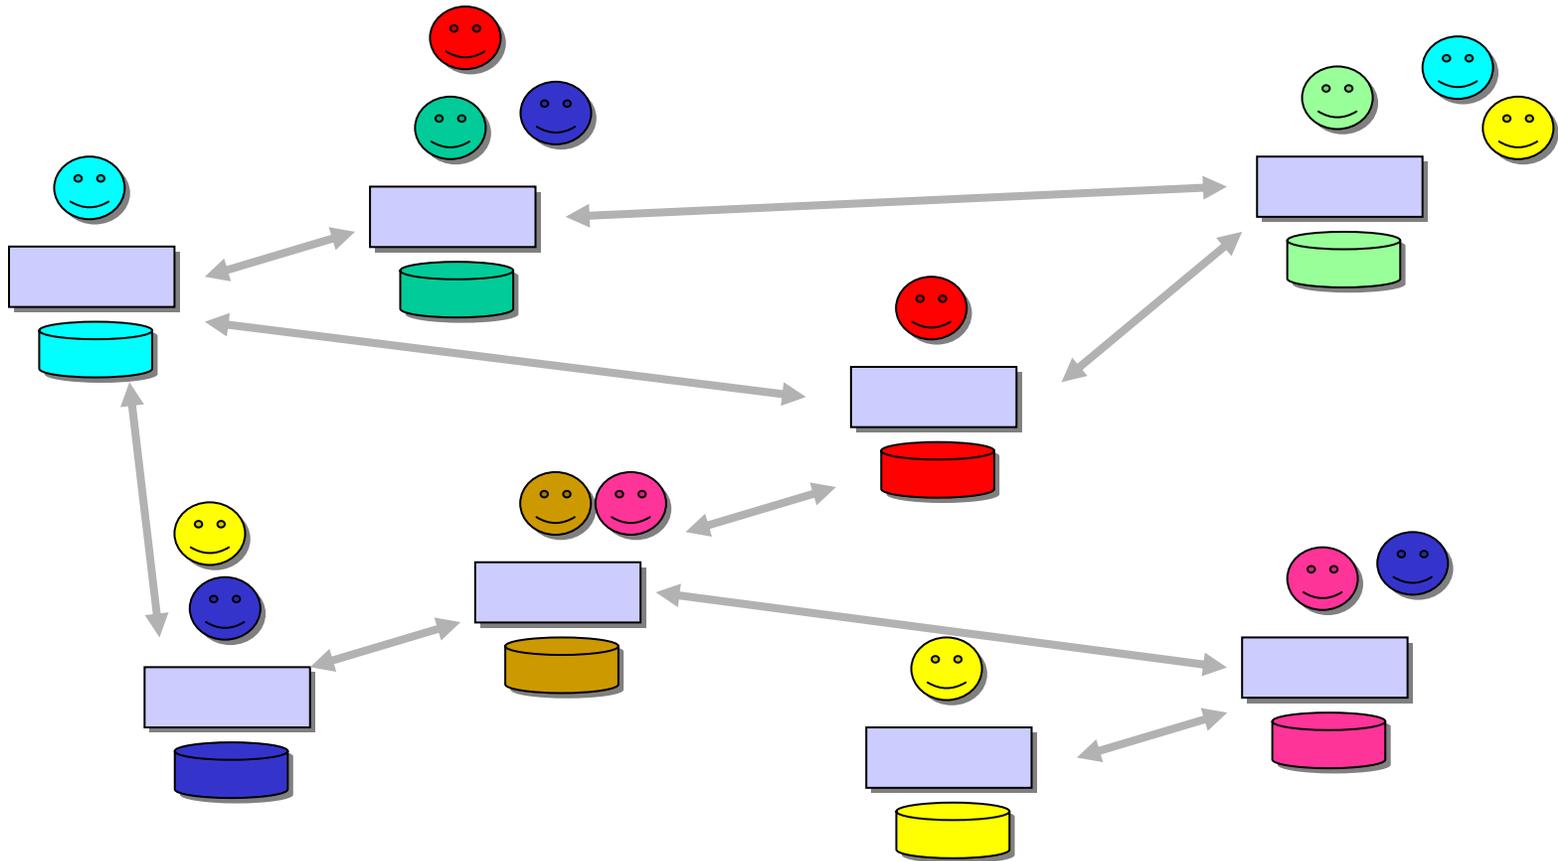

Environment-specific/Isolated and repeated efforts

Generic DLMS technology to build on

Myths about restricted applications

“All” applications

Future Digital Library Development

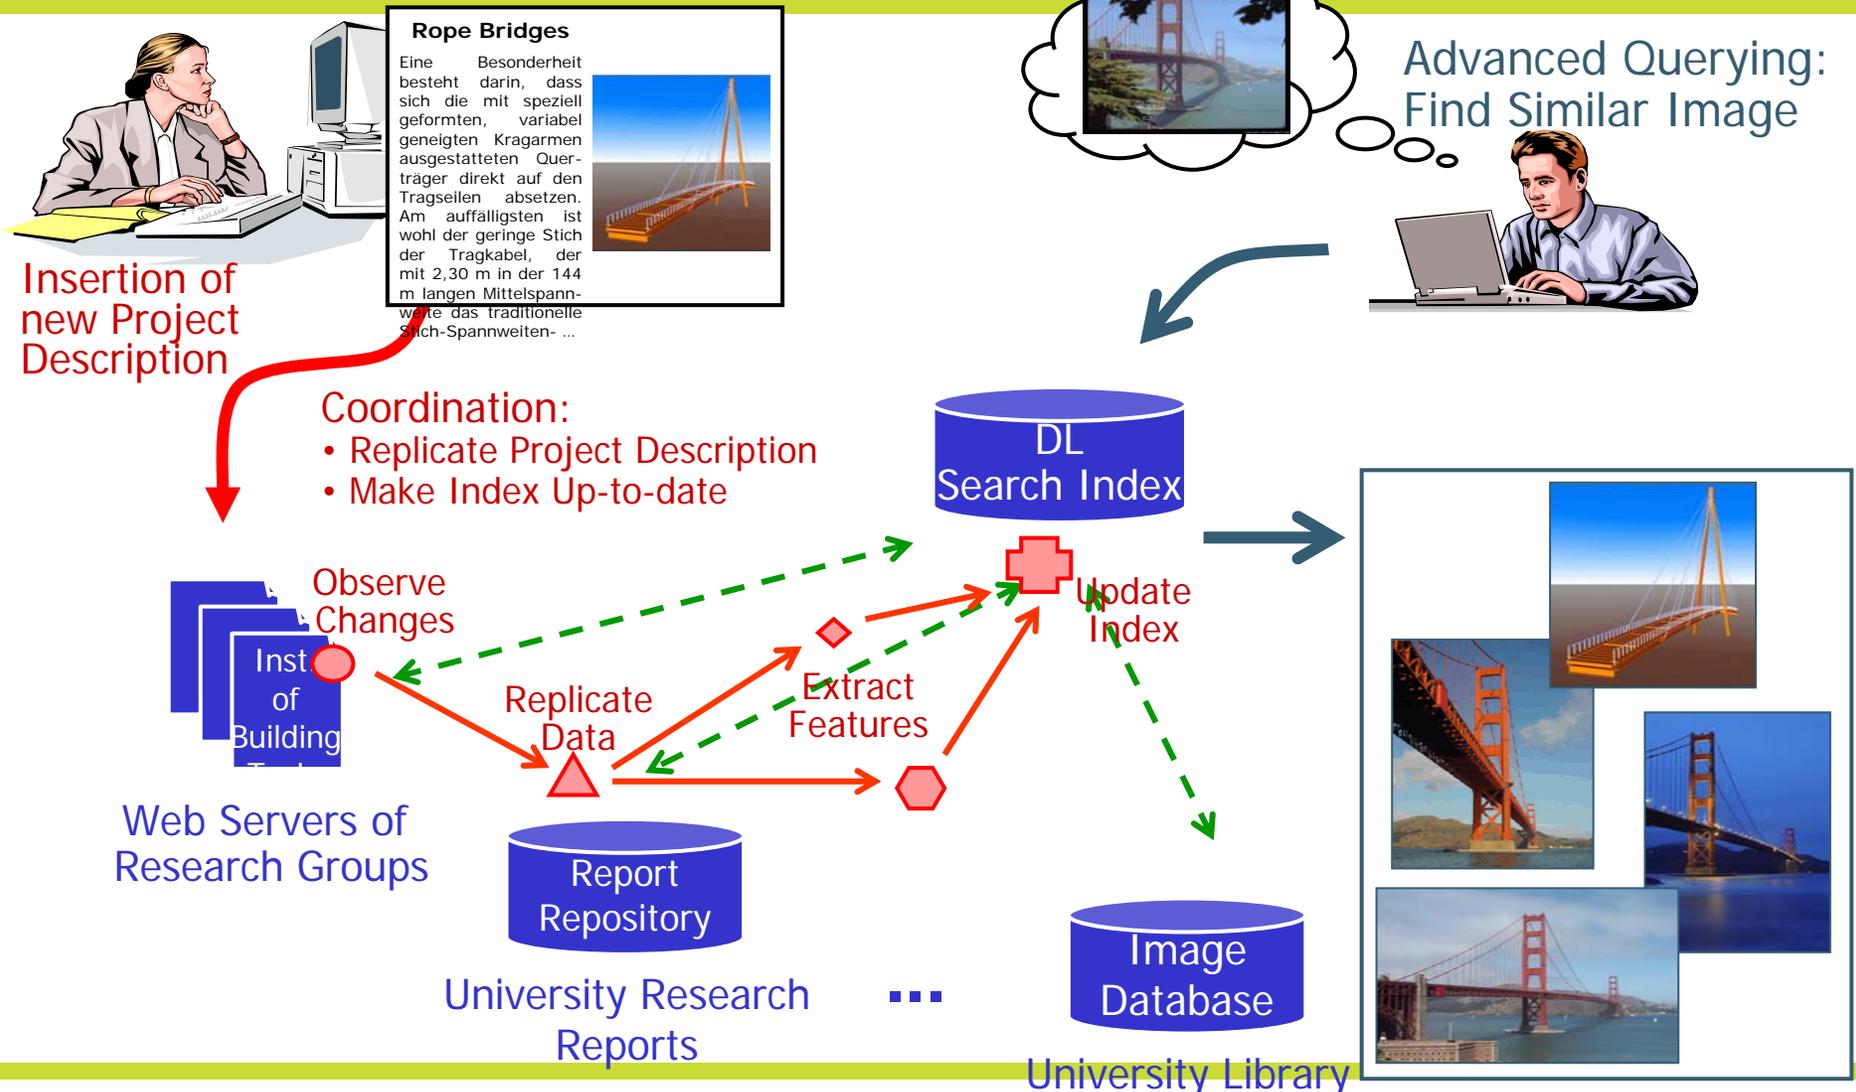

Stakeholders

- Past-Present: users and providers are mutually exclusive sets
- Future: `user' and `provider' are **roles**
 - Same actor may play both roles at different times
 - DLs at the center of scientific activity (collaboration & communication tool)
 - Increases set of actors and set of applications

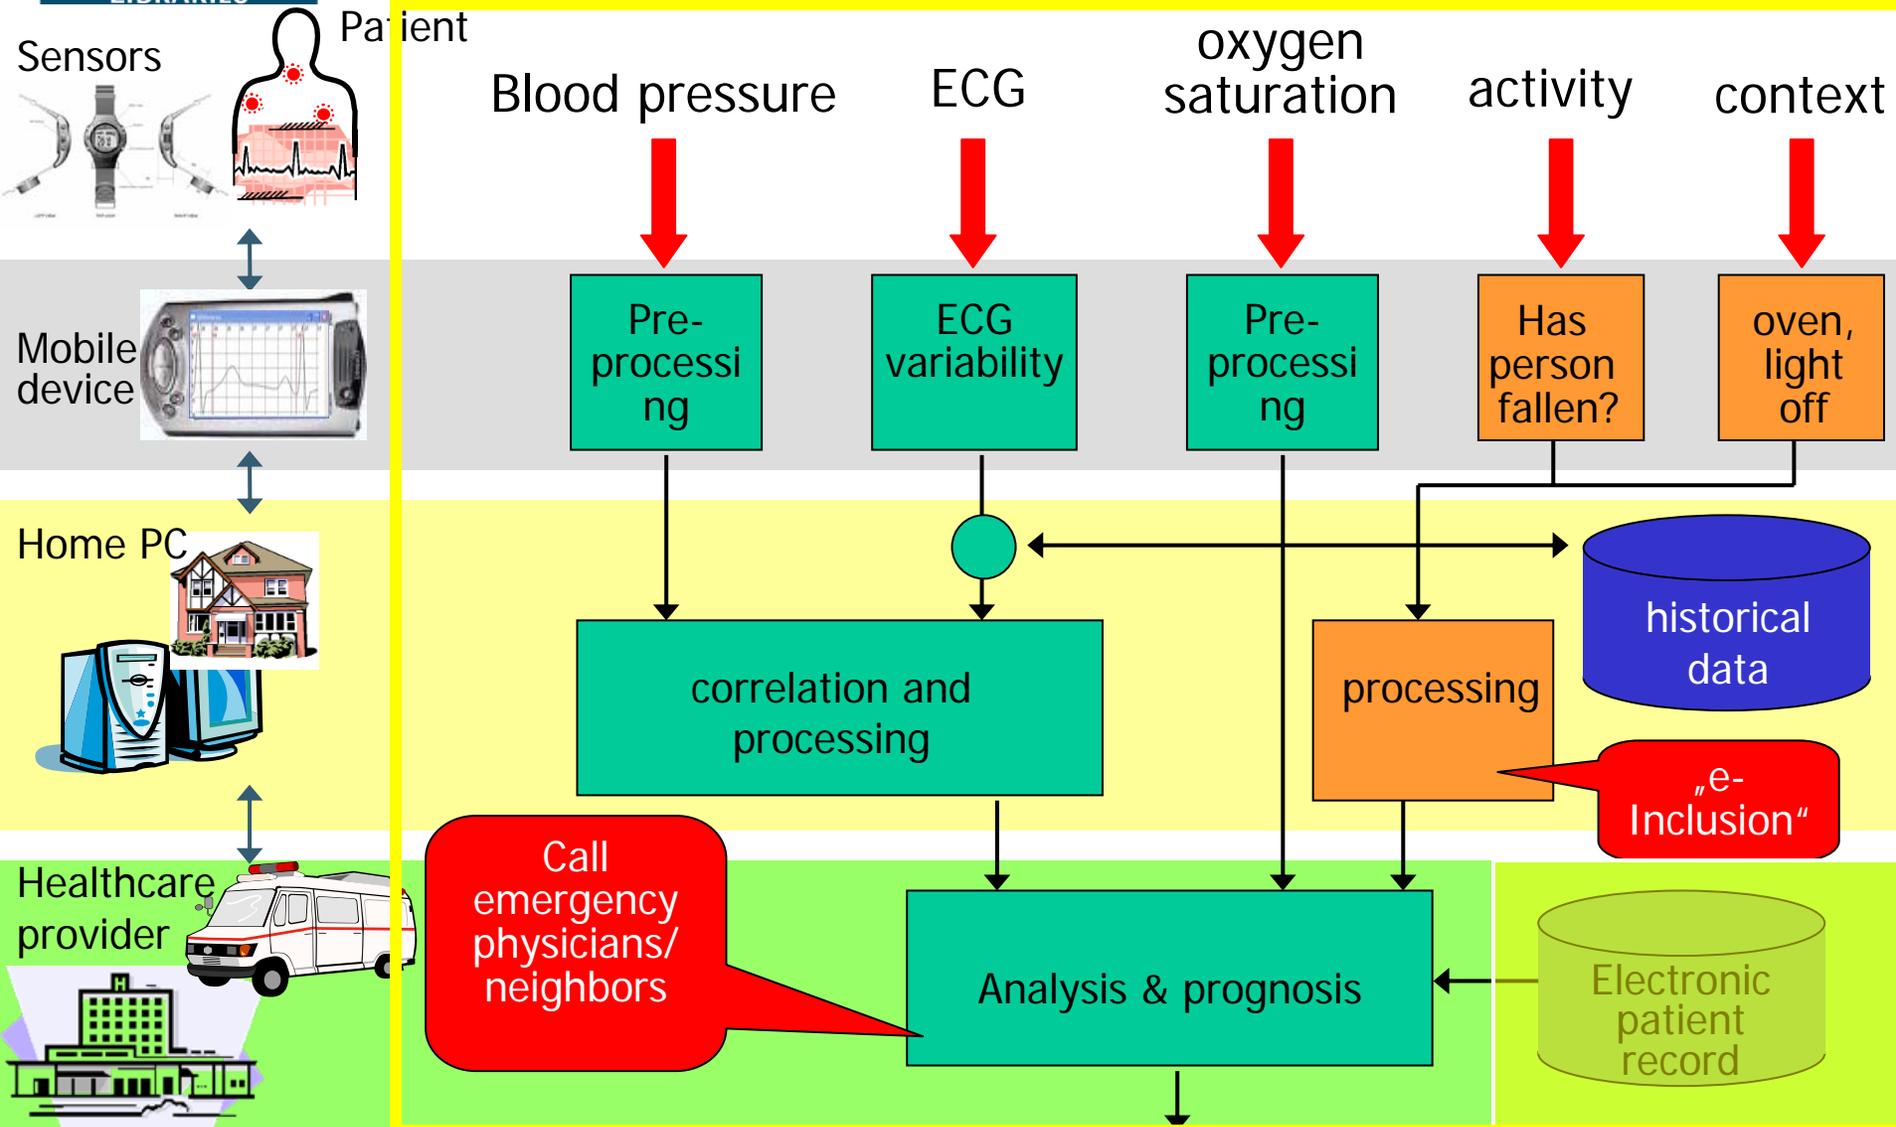

Applications

- DLs as parts of larger organizations and application contexts:
 - Health
 - Inclusion
 - Science
 - Government
 - Culture
 - Learning ...
 - Libraries, Museums, Archives, Hospitals, ...

Example 1: Virtual University

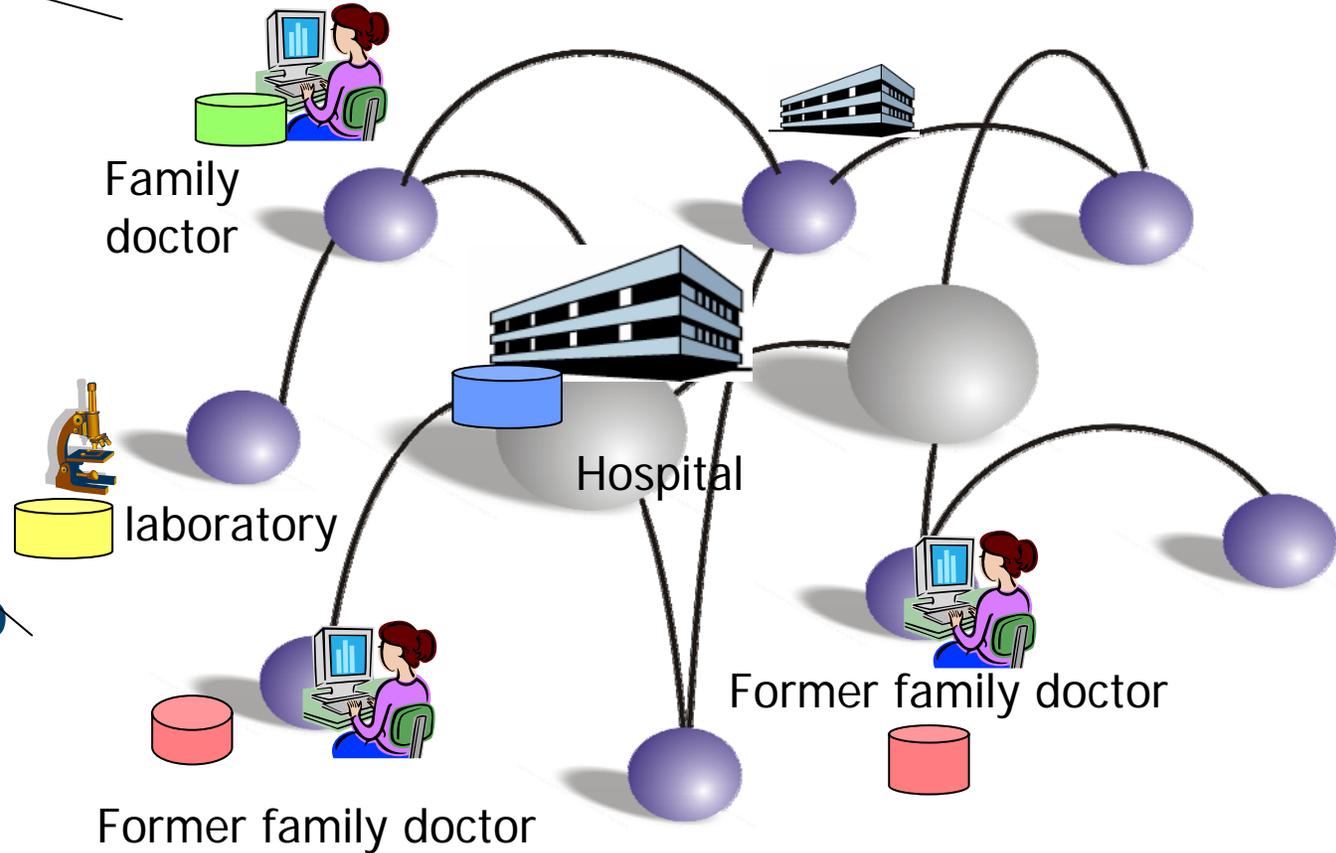

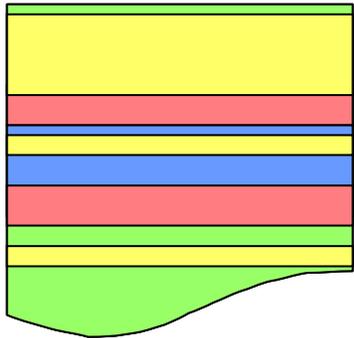

Example 2: eHealth Digital Libraries

Example 2: eHealth Digital Libraries

Electronic Patient Record

- Distributed Info
- Integration
- Protection

DELOS Agenda (1)

- *Foundational research*
 - Reference Model for Digital Library Systems
- *Systems-related research*
 - Digital Library System Architectures
 - Information Access to Digital Libraries
 - Audio/Visual Digital Libraries
 - Semantic Interoperability in Digital Libraries

DELOS Agenda (2)

- *User-related research*
 - User Interfaces for Digital Libraries
 - Digital Library Visualization
 - Personalization in Digital Libraries
- *Horizontal issues*
 - Digital Library Curation and Preservation
 - Digital Repositories
 - Digital Library Evaluation Methodologies
 - Digital Library Evaluation Infrastructures

DELOS Agenda (3)

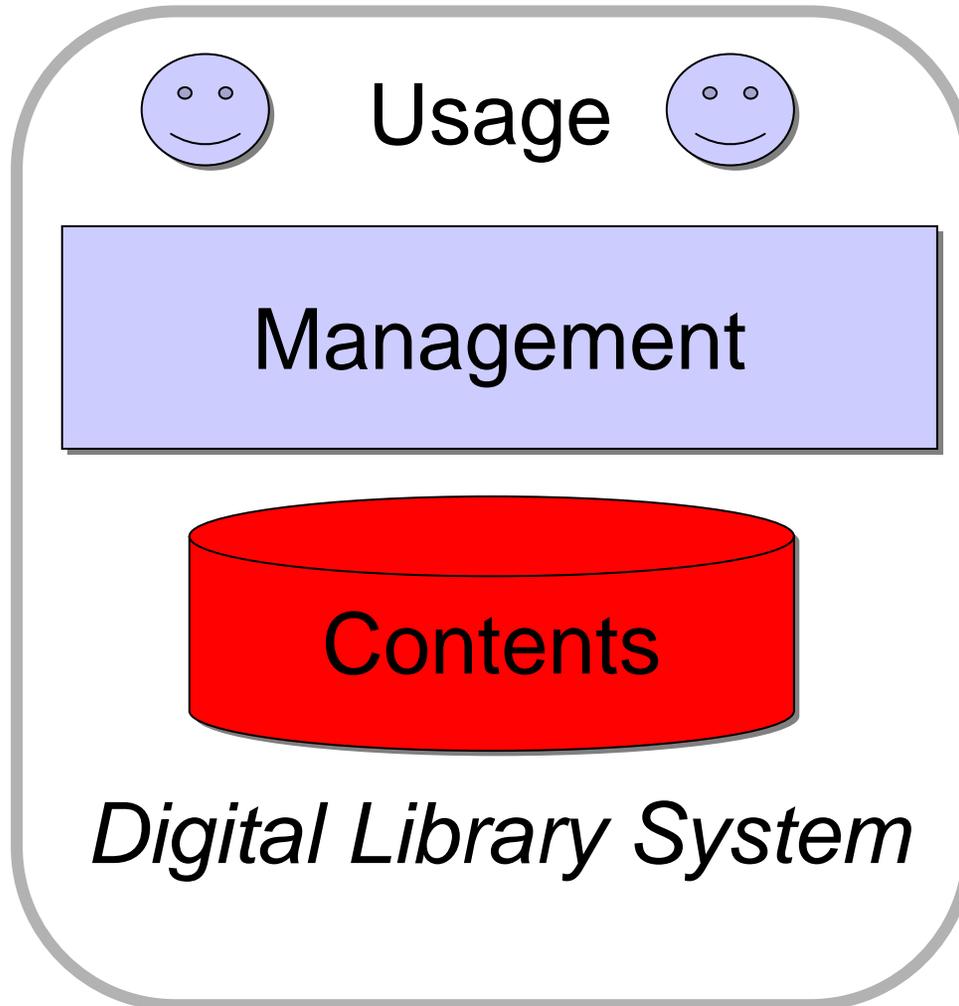

- *Applications*
 - E-Health Digital Libraries

i2010: Digital Libraries

- *Digitization (creating content)*
- *Accessibility (avoiding legal barriers)*
- *Preservation (protecting content from old age)*

i2010: Digital Libraries

i2010 within DELOS vision

- **What:** specialized content ~~and services~~
 - comprehensive
 - ~~rich forms and kinds.....~~
 - read-and-expand-mostly
- **Why:** learning and research
- **When:** value at depth of time
- **How:** ~~measurable quality~~

i2010 within DELOS vision

- i2010 a great first step
- i2010 only a first step
- i2010 many steps away from target

i2010 w/n DELOS: separation of concerns

- Digitization and physical preservation of content
→ member states
 - Legality/Accessibility of content → EU
-
- | | i2010 |
|--|----------|
| ■ Integration of content → EU | i2030(?) |
| ■ Management of content → EU | |
| ■ Addition of value to content through services → EU | |

i2010 in parallel with DELOS vision

- **Integration** of content (e-Content+)
 - Creation of vertical digital repositories
- **Management** of content (e-Infrastructures)
 - Development and deployment of a pan-European infrastructure
- **Addition of value** to content through services (e-Learning)
 - Devising sophisticated functionality
 - Serving exciting scenarios
 - Fertilizing “all” applications with this technology

Name

- (Adjective) (bit abstraction) (created entity)
- Digital Libraries
 - Adjective = digital
 - Bit abstraction = <>
 - Created entity = library
