

Information and communication technologies are changing the daily life. For a long time now, the computer is personal means of working, communication, learning, entertainment and more, be at the workplace, at home or on the move. The Oldenburg Institute for Information Technology (OFFIS), located in Oldenburg in the northwest of Germany, researches new forms of computer-based information processing in hardware and software systems and transfers the results into application-oriented developments. Institutions and industries use this worldwide. The research and development division **Multimedia and Internet Information Services** is researching key technologies of these developments. One of the research interests is focussing on semantic retrieval of multimedia data addressing topics such as:

- Content- and context based analysis and enrichment of digital images
- Geographic Web information retrieval for location based Web search
- Automatic indexing and usage of non-textual e-learning documents
- Individualized search in digital media

You can find more information about our projects and the research institute at

**http://www.offis.de/mi/index_e.php and
http://www.offis.de/download/portraet_e.pdf**

For the strengthening of our team, we are looking for a

Research Assistant

Applicants hold an excellent master degree (or equivalent) in computer science or closely related field and have several years of experience in application oriented research in the area of multimedia retrieval or related areas. A PhD is helpful but not mandatory. You are active, curious and willing to move things forward. Fluency in English and good knowledge of German is expected.

OFFIS Institute for Information Technology is a dynamic research institute with international orientation. We offer an interesting working environment for our staff. As a scientific institute cooperating with the University of Oldenburg, OFFIS offers excellent opportunities for professional and personal scientific qualification.

For more information, please contact the director of the R&D division MI, Mr. Jochen Meyer (phone +49-441-9722 185, mail meyer@offis.de).

Please apply at:

**OFFIS e.V., Personal
Escherweg 2, 26121 Oldenburg, Germany**

or by e-mail to:
